

Aditya Kalkur

Data Analyst | Business Intelligence | Data Analytics Professional

aduk2003@gmail.com | +91 9483530620 | linkedin.com/in/adityakalkur | github.com/Adityakalkur

Professional Summary

A results-oriented Data Analytics professional with a B.Tech in AI & Machine Learning and hands-on experience in end-to-end data analysis, statistical analysis, and business intelligence reporting. Proven ability to deliver data-driven insights, stakeholder-ready dashboards, and actionable recommendations through SQL, Python, and Power BI.

Technical Skills

- **SQL:** Complex JOINS, CTEs, Window Functions, GROUP BY, Subqueries, Aggregations | MySQL, PostgreSQL
- **Data Visualization:** Power BI (DAX), Tableau Public, Matplotlib, Seaborn, Microsoft Excel (Pivot Tables, VLOOKUP)
- **Programming:** Python (Pandas, NumPy, Scikit-learn, Hugging Face)
- **Machine Learning (Applied):** Regression, Classification, RFM Segmentation, NLP basics
- **Analytics:** Statistical Analysis, KPI Analysis, Cohort Analysis, Trend Analysis, Forecasting, ETL, Data Cleaning & Wrangling
- **Soft Skills:** Analytical Thinking, Collaboration, Verbal & Written Communication, Attention to Detail

Experience

Trainee Intern (Data Analytics & AI/ML), *Posspole Pvt. Ltd., Bangalore* Feb 2025 – Aug 2025

- Built an AI-powered chatbot for the Energy website through cross-functional collaboration, boosting user engagement by **40%**, and prepared written reporting dashboards for internal stakeholders.
- Developed ML solutions, including anomaly detection and classification models, for data-driven decision-making, improving system accuracy by **65%**.
- Migrated the proctoring model from Python to the MERN stack, reducing system latency by **50%**.

Projects

E-Commerce Business Performance Analysis | GitHub Apr 2026

- Performed end-to-end data cleaning and wrangling on a **1M+ row** dataset — resolved 243k missing IDs, removed 33,862 duplicates using Python (Pandas), producing 1,007,808 analysis-ready rows.
- Built a 7-KPI business intelligence report with cohort retention heatmap and RFM segmentation — identified **50.9% churn rate** representing **GBP 2,449,807 revenue at risk**; 76% of revenue in Champion segment.
- Linear Regression forecasting model (Scikit-learn) — **MAPE 21.2%**; 6-month projection of **GBP 627k–678k** monthly revenue; findings verbally presented and documented in stakeholder-ready report.

Employee Attrition EDA | GitHub Mar 2026

- Ran end-to-end EDA on IBM's HR dataset (**1,470 employees, 26 variables**), to isolate 5 key attrition drivers using Python.(Pandas, Matplotlib, Seaborn).
- Discovered overtime as the strongest predictor — overtime employees leave at **3x the rate** of others (30.5% vs. 10.4%); delivered data-driven HR policy recommendations on salary benchmarking and early-tenure retention.

Customer Demographics Descriptive Analysis | GitHub Nov 2025

- Analysed **4,000+ KPMG customer records** across 5 wealth quintiles and age groups using Python (Pandas, NumPy), identifying **3 high-value segments** through descriptive statistics and data analysis.
- Developed an interactive **Power BI business intelligence dashboard** with drill-down reporting across age group, wealth quintile, and purchasing patterns for stakeholder use.

Education

B.Tech in Artificial Intelligence & Machine Learning Dec 2021 – Aug 2025

KSIT (*Visvesvaraya Technological University*), Bangalore, Karnataka | GPA: 3.0

Certifications

Complete Python Bootcamp – **Udemy** | Data Visualization in Power BI – **DataCamp** | Advanced SQL – **DataCamp**
